Crimper - Aluminium Awning Window to suit all sections

This is a bench mounted machine using compressed air with 2 operations. 1). To Clamp, 2). To Crimp
Can be made to suit one or all sections. Weight approx 100kg

Able to view visible joint before crimping

Hand Cropping Tool

These tools can also be inserted into other presses to save effort and increase production.

Hinge Slotting Press

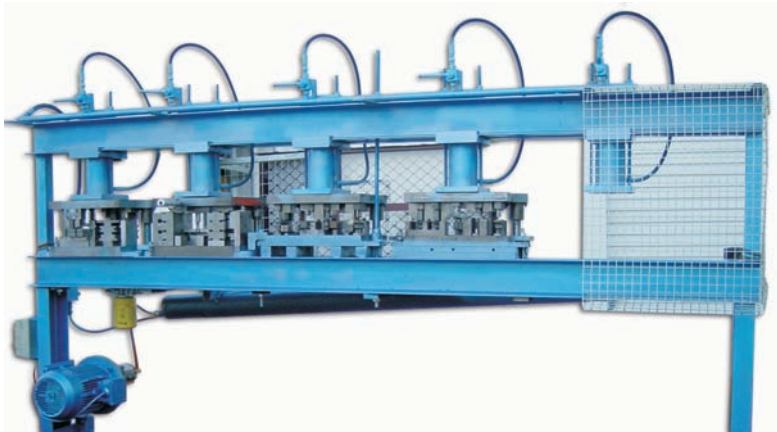

This machine has been designed to cut slots in the 100 series door jambs and door frames to suit hidden hinges.
The operator can complete this task in less than one minute for the door jambs and half a minute for the door frames.
Change over set up takes less than five minutes.
No router cutters required. Single phase power.
Hand or pneumatic press.
